COMMITTED TO THE FOUNDER'S SPIRIT OF INNOVATION

Resilience is a valuable commodity in times of disruption, because it is a foundation on which reliability and trust are built. In 2020 in particular, we have all encountered the truth of this in many ways. Our company has its roots in forestry, which means it is second nature for us to think in terms of extended timescales and cycles - just as the forest and the natural world require us to.

STIHL is celebrating its 95th anniversary this year. The company, which was founded almost a century ago by Andreas Stihl, is to this day still committed to our grandfather's innovative spirit and drive. We - now in the 3rd generation of the Stihl family - believe that the guarantee of the company's resilience is in its power to innovate, and ambition to always be a technological leader.

Whether you choose our combustion engines, cordless technology, or digital services such as fleet management for professional customers, as a STIHL user you can rely on us and be sure that with every development and every new advance, we deliver a tangible improvement - for example in terms of performance, ease-of-use, design, or services. We do our utmost to reinforce your trust in our sustainability and the dependable quality of our products and services. Ultimately, we create tools and solutions for you; so that you can master the tasks you face in nature with ease, and enjoy growing with these challenges.

THE STIHL DEALER DIFFERENCE

SEE WHY HOMEOWNERS AND PROS CHOOSE STIHL.

STIHL products are sold through authorized local STIHL Dealers. Why? Because we demand that dealers are knowledgeable about the STIHL products they sell. That way, they can help match you with the right tool for your job.

You won't find that at the big box stores - and that's why you won't find STIHL there either.

Visit your local STIHL Dealer for great prices on the most essential outdoor equipment. Order products online with STIHL Express and they'll be ready for you to pick up. With more than 10,000 local authorized STIHL Dealers nationwide, there's one conveniently located near you.

LOOK AT WATT HOURS, NOT VOLTS.

VOLTS ONLY TELL HALF THE STORY

STIHL lithium-ion batteries feature advanced construction and innovative engineering to maximize run times (watt hours). Simply put, more watt hours mean longer run times, allowing you to finish more work on a single charge.

GUIDE BARS

High-quality guide bars for your chain saw.

STIHL ROLLOMATIC® E SUPER

A solid-machined bar made of high-grade steel with the groove milled out and a replaceable sprocket nose assembly riveted in place. The sprocket is incorporated in the replaceable sprocket nose assembly of the bar and carries the saw chain from the top to the bottom of the bar.

STIHL ROLLOMATIC® ES LIGHT

Milled out and filled with aluminum to make it up to 30% lighter than the STIHL ROLLOMATIC® E Super guide bar. The reduced weight improves chain saw balance and decreases operator fatigue, especially on longer bars. A replaceable sprocket nose assembly is incorporated in the nose of the bar to reduce wear and enable the bar nose to be made considerably narrower.

STIHL DUROMATIC® E

A rugged bar made from a solid, laser-welded, high-carbon alloy steel bar with induction-hardened rails and special hard surface alloy tipping on the nose for extra-long life. Made from the highest quality steel and cut by laser for consistent quality, durability and high-wear resistance.

STIHL DUROMATIC® C CARVING

Made from a solid billet of the highest quality steel and cut by laser for consistent quality, durability and high-wear resistance. Available in 10" and 12" lengths with solid nose, this carving guide bar can only be used with 1/4" saw chains.

ENGINE OILS, PREMIXED FUEL, BAR & CHAIN OIL

Quality fuel specially formulated to keep your STIHL running strong.

HIGH PERFORMANCE 2-CYCLE ENGINE OIL

STIHL Moto4™

Patented STIHL Moto4™ utilizes an ethanol-free formula, allowing the fuel to stay fresh longer – up to two years after the container is opened – than alternative fuel options containing ethanol. Designed for use in 4-stroke products only, with a minimum octane range of 93 to consistently deliver excellent engine performance.

WOODCUTTER BAR AND CHAIN OIL

STIHL Woodcutter Bar and Chain Oil is affordably priced and specially formulated from base oils and additives to provide proper lubrication of chain saw guide bars, saw chains and oil pumps.

BIOPLUS™ BAR AND CHAIN OIL

STIHL BioPlus™ Bar and Chain Oil is made with a vegetable oil base, making it less harmful to humans, animals, micro-organisms, and plants. Rated by the Coordinating European Council to be 93.8% biodegradable in only 21 days.

PLATINUM BAR AND CHAIN OIL

STIHL Platinum Bar and Chain Oil is formulated to adhere to the bar and chain, and to reduce wear. Special base oil formulation helps keep sap and pitch from clinging to the bar and chain.

NOTE: STIHL recommends using fuel with no more than 10% ethanol content. Using fuel with greater than 10% ethanol content may cause damage to your equipment and may void your STIHL limited warranty.

IMPORTANT INFORMATION

To reduce the risk of injury from blade contact, circular saw blades may be used on FS brushcutters that have a bicycle handle and double shoulder harness and not on FS brushcutters with a "J" handle or loop handle (R). Other rigid blades may be used on FS brushcutters having a bicycle handle, a "J" handle, or a loop handle equipped with a barrier bar. To reduce the risk of eye injury, always wear proper eye protection. Always use the appropriate deflector for the type of cutting attachment, as explained in your instruction manual.

WARNING FOR CORDED-ELECTRIC AND BATTERY CHAIN SAW USERS!
The fibers may not stop the sprocket on most corded-electric chain saws and some battery-powered chain saws because of the constant high torque. However, to reduce the severity of injury from accidental contact with the chain, STIHL recommends that leg protection be worn when operating these types of chain saws.

IMPORTANT INFORMATION
All STIHL chain saw leg protection meets or exceeds OSHA Regulation 1910.266 for Personal Protective Equipment for chain saw operators.

NOTE: Chaps are measured by overall length from the waist down. All chaps have a tough outer shell of oil/water-resistant nylon treated with rain/stain repellent.

IMPORTANT INFORMATION

WARNING: These garments contain pads of cut-retardant material designed to reduce the risk or severity of injury to the body parts covered by the pads in the event of contact with the rotating chain. The fibers in the pads provide extra layers of material and are designed to rip apart when they come into contact with the moving chain and to clog the sprocket and stop the chain. In some contacts, the pads may stop the chain. In other contacts, the pads will resist the cutting process only for a fraction of a second. The actual degree of protection afforded will vary with the speed of the chain and the time of contact, the power and torque of the saw, the design of the chain saw sprocket, and similar factors. Follow the washing instructions. Improper care may destroy cut-retardant properties of the material.

WARNING FOR CORDED-ELECTRIC AND BATTERY CHAIN SAW USERS!

The fibers may not stop the sprocket on most corded-electric chain saws and some battery-powered chain saws because of the constant high torque. However, to reduce the severity of injury from accidental contact with the chain, STIHL recommends that leg protection be worn when operating these types of chain saws.
